DETAILED ACTION***Allowable Subject Matter***

Claims 1-4, 6-13

The following is an examiner's statement of reasons for allowance: The prior art taken either singularity or in combination fails to anticipate or fairly suggest the limitations of the independent claim, in such a manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in independent claims 1, 8, 10, 12. With the allowable features being; wherein all of the gears supported by the first and second axes are identical to each other(claim 1); wherein all of the at least three gears supported by the first and second gear supporting axes are identical to each other(claim 8); at least two of the identical double gears being arranged immediately adjacent each other, and being independently rotatable with respect to each other, along the optical axis direction on second axis, the identical double gears arranged on the second axis(claim 10); at least four identical double gears, at least two of the identical double gears being arranged immediately adjacent each other, and being independently rotatable with respect to each other, along the first axis, and at least another two of the identical double gears being arranged immediately adjacent each other , and being independently rotatable with respect to each other, along the second axis,

the identical double gears arranged on the second axis(claim 12). Therefore claims 1-4, 6-13 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
